DO YOU KNOW?

The federal government, through the Drug Enforcement Administration (DEA) has established a rating system, or “schedule” to designate every drug’s relative safety and risk of abuse, with Schedule I being the most dangerous.

By this Schedule, cannabis/marijuana is rated a I, while methamphetamine and cocaine are Schedule II, and synthetic THC is a Schedule III substance.

Schedule I drugs are totally banned, and cannot be prescribed at all, while far more dangerous drugs are legally available at every pharmacy!

Please ask your federal representatives to reschedule cannabis!

Senator Jerry Moran
